

ISLAND HEALTH - OCCUPATIONAL HEALTH & SAFETY
NEW HIRE IMMUNITY & TB SCREENING ASSESSMENTS
EMPLOYEE IMMUNIZATION UPDATES
Attention: Please carefully read all information provided below

Immunization is an essential service. The continuity and prioritization of immunization programs are facilitated in order to avoid unintentional consequences such as unimmunized employees and increases in vaccine preventable diseases.

NOTE: These clinics are scheduled and by appointment only.
Please phone your Employee Health Nurse in your GEO (see contact information below),
with any enquiries and to schedule an appointment.

Vaccine and TB Screening Recommendations and Criteria

As per the BC Centre for Disease Control, the following immunizations for health care workers may be recommended, dependent on job description and the potential exposure risks to vaccine preventable diseases.

All employees:

- Measles/Mumps/Rubella (MMR)
- Varicella (Chickenpox)
- Tetanus/Diphtheria (Td)
- Influenza (most recent immunization, during influenza season)
- Tuberculosis Screening (most recent TB skin test or chest x-ray)

Direct patient care workers of select populations:

- Hepatitis B
- Polio
- Pertussis (Tdap)
